Issue

- 1 From 1 January 1999, the effective start of Economic and Monetary Union (EMU), the euro will become a currency in its own right and the conversion rates between the euro and the participating national currencies will be irrevocably fixed, ie the risk of subsequent exchange differences related to these currencies is eliminated from this date on.
- 2 The issue is the application of SB-FRS 21 to the changeover from the national currencies of participating Member States of the European Union to the euro ('the changeover').

Consensus

- 3 The requirements of SB-FRS 21 regarding the translation of foreign currency transactions and financial statements of foreign operations should be strictly applied to the changeover. The same rationale applies to the fixing of exchange rates when countries join EMU at later stages.
- 4 This means that, in particular:
 - (a) foreign currency monetary assets and liabilities resulting from transactions shall continue to be translated into the functional currency at the closing rate. Any resultant exchange differences shall be recognised as income or expense immediately, except that an entity shall continue to apply its existing accounting policy for exchange gains and losses related to hedges of the currency risk of a forecast transaction;
 - (b) cumulative exchange differences relating to the translation of financial statements of foreign operations, recognised in other comprehensive income, shall be accumulated in equity and shall be reclassified from equity to profit or loss only on the disposal or partial disposal of the net investment in the foreign operation; and
 - (c) exchange differences resulting from the translation of liabilities denominated in participating currencies shall not be included in the carrying amount of related assets.

Effective date

This Interpretation becomes effective on 1 February 2006. Changes in accounting policies shall be accounted for according to the requirements of SB-FRS 8.
