## **Introduction**

---

This document sets out amendments to Statutory Board Financial Reporting Standards (SB-FRSs) made during the Annual Improvements project.

These amendments result from proposals that were contained in the Exposure Draft of proposed amendments to SB-FRSs, Annual Improvements to SB-FRSs, published in June 2012.

The Annual Improvements project provides a vehicle for making non-urgent but necessary amendments to SB-FRSs.

Some amendments result in consequential amendments to other SB-FRSs. Those consequential amendments are set out in the same section as the amended SB-FRS.

The effective date of each amendment is included in the SB-FRSs affected.

**SB-FRSs addressed**

The following table shows the topics addressed by these amendments.

## Amendment to SB-FRS 102 *Share-based Payment*

---

Paragraphs 15 and 19 were amended and paragraph 63B was added. New text is underlined and deleted text is struck through.

### Transactions in which services are received

...

- 15 If the equity instruments granted do not vest until the counterparty completes a specified period of service, the entity shall presume that the services to be rendered by the counterparty as consideration for those equity instruments will be received in the future, during the *vesting period*. The entity shall account for those services as they are rendered by the counterparty during the vesting period, with a corresponding increase in equity. For example:
- (a) ...
- (b) if an employee is granted share options conditional upon the achievement of a ~~performance condition~~ performance condition and remaining in the entity's employ until that performance condition is satisfied, and the length of the vesting period varies depending on when that performance condition is satisfied, the entity shall presume that the services to be rendered by the employee as consideration for the share options will be received in the future, over the expected vesting period. ...

### Treatment of vesting conditions

- 19 A grant of equity instruments might be conditional upon satisfying specified ~~vesting conditions~~ vesting conditions. For example, a grant of shares or share options to an employee is typically conditional on the employee remaining in the entity's employ for a specified period of time. There might be performance conditions that must be satisfied, such as the entity achieving a specified growth in profit or a specified increase in the entity's share price. Vesting conditions, other than market conditions, shall not be taken into account when estimating the fair value of the shares or share options at the measurement date. Instead, vesting conditions shall be taken into account by adjusting the number of equity instruments included in the measurement of the transaction amount so that, ultimately, the amount recognised for goods or services received as consideration for the equity instruments granted shall be based on the number of equity instruments that eventually vest. Hence, on a cumulative basis, no amount is recognised for goods or services received if the equity instruments granted do not vest because of failure to satisfy a ~~vesting condition~~ vesting condition, eg the counterparty fails to complete a specified service period, or a performance condition is not satisfied, subject to the requirements of paragraph 21.

- 63B Improvements to SB-FRSs, issued in January 2014, amended paragraphs 15 and 19. In Appendix A, the definitions of 'vesting conditions' and 'market condition' were amended and the definitions of 'performance condition' and 'service condition' were added. An entity shall prospectively apply that amendment to share-based payment transactions for which the grant date is on or after 1 July 2014. Earlier application is permitted. If an entity applies that amendment for an earlier period it shall disclose that fact.

In Appendix A, the definitions of 'market condition' and 'vesting conditions' are amended and the definitions of 'performance condition' and 'service condition' are added. New text is underlined and deleted text is struck through.

- (a) attaining a specified share price or a specified amount of **intrinsic value** of a **share option**; or
- (b) achieving a specified target that is based on the market price (or value) of the entity's **equity instruments** (or the equity instruments of another entity in the same group) relative to an index of market prices of **equity instruments** of other entities.

The period of achieving the performance target(s):

- (a) shall not extend beyond the end of the service period; and
- (b) may start before the service period on the condition that the commencement date of the performance target is not substantially before the commencement of the service period.

A performance target is defined by reference to:

- (a) the entity's own operations (or activities) or the operations or activities of another entity in the same group (ie a non-market condition); or
- (b) the price (or value) of the entity's **equity instruments** or the equity instruments of another entity in the same group (including shares and **share options**) (ie a **market condition**).

A performance target might relate either to the performance of the entity as a whole or to some part of the entity (or part of the group), such as a division or an individual employee.

...

The acquirer shall classify as an asset a right to the return of previously transferred consideration if specified conditions are met. Paragraph 58 provides guidance on the subsequent accounting for contingent consideration.

...

### **Contingent consideration**

- 58 Some changes in the fair value of contingent consideration that the acquirer recognises after the acquisition date may be the result of additional information that the acquirer obtained after that date about facts and circumstances that existed at the acquisition date. Such changes are measurement period adjustments in accordance with paragraphs 45–49. However, changes resulting from events after the acquisition date, such as meeting an earnings target, reaching a specified share price or reaching a milestone on a research and development project, are not measurement period adjustments. The acquirer shall account for changes in the fair value of contingent consideration that are not measurement period adjustments as follows:

(a) ...

(b) Other contingent consideration classified as an asset or a liability that:

(i) ~~is a financial instrument and~~ is within the scope of SB-FRS 39 shall be measured at fair value at each reporting date, with any resulting gain or loss recognised either in profit or loss or in other comprehensive income and changes in fair value shall be recognised in profit or loss in accordance with SB-FRS 39.

- (a) ~~restated proportionately the gross carrying amount is adjusted in a manner that is~~ consistent with the change in the gross carrying amount of the asset so that revaluation of the carrying amount of the asset. For example, the gross carrying amount may be restated by reference to observable market data or it may be restated proportionately to the change in the carrying amount. The accumulated depreciation at the date of the revaluation is adjusted to equal the difference between the gross carrying amount and the carrying amount of the asset after taking into account accumulated impairment losses; or after revaluation equals its revalued amount. This method is often used when an asset is revalued by means of applying an index to determine its replacement cost (see SB-FRS 1013).
- (b) ~~the accumulated depreciation is eliminated against the gross carrying amount of the asset, and the net amount restated to the revalued amount of the asset. This method is often used for buildings.~~

The amount of the adjustment ~~arising on the restatement or elimination~~ of accumulated depreciation forms part of the increase or decrease in carrying amount that is accounted for in accordance with paragraphs 39 and 40.
