AMENDMENTS TO SB-FRS 12 INCOME TAXES

**Definitions** 

Measurement

**Effective date** 

Withdrawal of INT SB-FRS 21

#### Introduction

This document sets out amendments to SB-FRS 12 Income Taxes.

The amendments provide a practical approach for measuring deferred tax liabilities and deferred tax assets when investment property is measured using the fair value model in SB-FRS 40 *Investment Property*. Under SB-FRS 12, the measurement of deferred tax liabilities and deferred tax assets depends on whether an entity expects to recover an asset by using it or by selling it. However, it is often difficult and subjective to determine the expected manner of recovery when the investment property is measured using the fair value model in SB-FRS 40.

To provide a practical approach in such cases, the amendments introduce a presumption that an investment property is recovered entirely through sale. This presumption is rebutted if the investment property is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale.

INT SB-FRS-21 *Income Taxes—Recovery of Revalued Non-Depreciable Assets* addresses similar issues involving non-depreciable assets measured using the revaluation model in SB-FRS 16 *Property, Plant and Equipment.* The amendments incorporate INT SB-FRS 21 into SB-FRS 12 after excluding investment property measured at fair value from the scope of the guidance previously contained in INT SB-FRS 21.

# Amendments to SB-FRS 12 *Income Taxes*

Paragraph 52 is renumbered as paragraph 51A. Paragraph 10 and the examples following paragraph 51A are amended (new text is underlined and deleted text is struck through). Paragraphs 51B and 51C and the following example, and paragraphs 51D, 51E, 98 and 99 are added.

#### **Definitions**

#### Tax base

Where the tax base of an asset or liability is not immediately apparent, it is helpful to consider the fundamental principle upon which this Standard is based: that an entity shall, with certain limited exceptions, recognise a deferred tax liability (asset) whenever recovery or settlement of the carrying amount of an asset or liability would make future tax payments larger (smaller) than they would be if such recovery or settlement were to have no tax consequences. Example C following paragraph 52 51A illustrates circumstances when it may be helpful to consider this fundamental principle, for example, when the tax base of an asset or liability depends on the expected manner of recovery or settlement.

#### Measurement

- <u>51A</u>52In some jurisdictions, the manner in which an entity recovers (settles) the carrying amount of an asset (liability) may affect either or both of:
  - (a) the tax rate applicable when the entity recovers (settles) the carrying amount of the asset (liability); and
  - (b) the tax base of the asset (liability).

In such cases, an entity measures deferred tax liabilities and deferred tax assets using the tax rate and the tax base that are consistent with the expected manner of recovery or settlement.

#### **Example A**

An asset item of property, plant and equipment has a carrying amount of 100 and a tax base of 60. A tax rate of 20% would apply if the asset item were sold and a tax rate of 30% would apply to other income.

The entity recognises a deferred tax liability of 8 (40 at 20%) if it expects to sell the asset item without further use and a deferred tax liability of 12 (40 at 30%) if it expects to retain the asset item and recover its carrying amount through use.

#### Example B

An asset item of property, plant and equipment with a cost of 100 and a carrying amount of 80 is revalued to 150. No equivalent adjustment is made for tax purposes. Cumulative depreciation for tax purposes is 30 and the tax rate is 30%. If the asset item is sold for more than cost, the cumulative tax depreciation of 30 will be included in taxable income but sale proceeds in excess of cost will not be taxable.

The tax base of the asset item is 70 and there is a taxable temporary difference of 80. If the entity expects to recover the carrying amount by using the asset item, it must generate taxable income of 150, but will only be able to deduct depreciation of 70. On this basis, there is a deferred tax liability of 24 (80 at 30%). If the entity expects to recover the carrying amount by selling the asset item immediately for proceeds of 150, the deferred tax liability is computed as follows:

	Taxable Temporary Difference	Tax Rate	Deferred Tax Liability
Cumulative tax depreciation	30	30%	9
Proceeds in excess of cost	50	nil	-
Total	80		9

(note: in accordance with paragraph 61A, the additional deferred tax that arises on the revaluation is recognised in other comprehensive income)

#### **Example C**

The facts are as in example B, except that if the asset item is sold for more than cost, the cumulative tax depreciation will be included in taxable income (taxed at 30%) and the sale proceeds will be taxed at 40%, after deducting an inflation-adjusted cost of 110.

If the entity expects to recover the carrying amount by using the asset item, it must generate taxable income of 150, but will only be able to deduct depreciation of 70. On this basis, the tax base is 70, there is a taxable temporary difference of 80 and there is a deferred tax liability of 24 (80 at 30%), as in example B.

If the entity expects to recover the carrying amount by selling the asset item immediately for proceeds of 150, the entity will be able to deduct the indexed cost of 110. The net proceeds of 40 will be taxed at 40%. In addition, the cumulative tax depreciation of 30 will be included in taxable income and taxed at 30%. On this basis, the tax base is 80 (110 less 30), there is a taxable temporary difference of 70 and there is a deferred tax liability of 25 (40 at 40% plus 30 at 30%). If the tax base is not immediately apparent in this example, it may be helpful to consider the fundamental principle set out in paragraph 10.

(note: in accordance with paragraph 61A, the additional deferred tax that arises on the revaluation is recognised in other comprehensive income)

- If a deferred tax liability or deferred tax asset arises from a non-depreciable asset measured using the revaluation model in SB-FRS 16, the measurement of the deferred tax liability or deferred tax asset shall reflect the tax consequences of recovering the carrying amount of the non-depreciable asset through sale, regardless of the basis of measuring the carrying amount of that asset. Accordingly, if the tax law specifies a tax rate applicable to the taxable amount derived from the sale of an asset that differs from the tax rate applicable to the taxable amount derived from using an asset, the former rate is applied in measuring the deferred tax liability or asset related to a non-depreciable asset.
- If a deferred tax liability or asset arises from investment property that is measured using the fair value model in SB-FRS 40, there is a rebuttable presumption that the carrying amount of the investment property will be recovered through sale. Accordingly, unless the presumption is rebutted, the measurement of the deferred tax liability or deferred tax asset shall reflect the tax consequences of recovering the carrying amount of the investment property entirely through sale. This presumption is rebutted if the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. If the presumption is rebutted, the requirements of paragraphs 51 and 51A shall be followed.

#### **Example illustrating paragraph 51C**

An investment property has a cost of 100 and fair value of 150. It is measured using the fair value model in SB-FRS 40. It comprises land with a cost of 40 and fair value of 60 and a building with a cost of 60 and fair value of 90. The land has an unlimited useful life.

Cumulative depreciation of the building for tax purposes is 30. Unrealised changes in the fair value of the investment property do not affect taxable profit. If the investment property is sold for more than cost, the reversal of the cumulative tax depreciation of 30 will be included in taxable profit and taxed at an ordinary tax rate of 30%. For sales proceeds in excess of cost, tax law specifies tax rates of 25% for assets held for less than two years and 20% for assets held for two years or more.

Because the investment property is measured using the fair value model in SB-FRS 40, there is a rebuttable presumption that the entity will recover the carrying amount of the investment property entirely through sale. If that presumption is not rebutted, the deferred tax reflects the tax consequences of recovering the carrying amount entirely through sale, even if the entity expects to earn rental income from the property before sale.

The tax base of the land if it is sold is 40 and there is a taxable temporary difference of 20 (60 - 40). The tax base of the building if it is sold is 30 (60 - 30) and there is a taxable temporary difference of 60 (90 - 30). As a result, the total taxable temporary difference relating to the investment property is 80 (20 + 60).

continued...

#### ...continued

#### Example illustrating paragraph 51C

In accordance with paragraph 47, the tax rate is the rate expected to apply to the period when the investment property is realised. Thus, the resulting deferred tax liability is computed as follows, if the entity expects to sell the property after holding it for more than two years:

	Taxable Temporary Difference	Tax Rate	Deferred Tax Liability
Cumulative tax depreciation	30	30%	9
Proceeds in excess of cost	50	20%	10
Total	80		19

If the entity expects to sell the property after holding it for less than two years, the above computation would be amended to apply a tax rate of 25%, rather than 20%, to the proceeds in excess of cost.

If, instead, the entity holds the building within a business model whose objective is to consume substantially all of the economic benefits embodied in the building over time, rather than through sale, this presumption would be rebutted for the building. However, the land is not depreciable. Therefore the presumption of recovery through sale would not be rebutted for the land. It follows that the deferred tax liability would reflect the tax consequences of recovering the carrying amount of the building through use and the carrying amount of the land through sale.

The tax base of the building if it is used is 30 (60 - 30) and there is a taxable temporary difference of 60 (90 - 30), resulting in a deferred tax liability of 18 (60 at 30%).

The tax base of the land if it is sold is 40 and there is a taxable temporary difference of 20 (60 - 40), resulting in a deferred tax liability of 4 (20 at 20%).

As a result, if the presumption of recovery through sale is rebutted for the building, the deferred tax liability relating to the investment property is 22 (18 + 4).

- 51D The rebuttable presumption in paragraph 51C also applies when a deferred tax liability or a deferred tax asset arises from measuring investment property in a business combination if the entity will use the fair value model when subsequently measuring that investment property.
- Paragraphs 51B–51D do not change the requirements to apply the principles in paragraphs 24–33 (deductible temporary differences) and paragraphs 34–36 (unused tax losses and unused tax credits) of this Standard when recognising and measuring deferred tax assets.

#### **Effective date**

Paragraph 52 was renumbered as 51A, paragraph 10 and the examples following paragraph 51A were amended, and paragraphs 51B and 51C and the following example and paragraphs 51D, 51E and 99 were added by *Deferred Tax: Recovery of Underlying Assets*, issued in February 2011. An entity shall apply those amendments for annual periods beginning on or after 1 January 2012. Earlier application is permitted. If an entity applies the amendments for an earlier period, it shall disclose that fact.

### Withdrawal of INT SB-FRS 21

99 The amendments made by *Deferred Tax: Recovery of Underlying Assets*, issued in February 2011, supersede INT SB-FRS 21 *Income Taxes—Recovery of Revalued Non-Depreciable Assets*.
